PROFESSIONAL PROFILE

Informatics Engineer (coursework completed; final graduation project — TFG — pending, to be completed in the last term of 2026) with 3+ years of experience across technical support, systems administration, cybersecurity, and hands-on software development, combining Service Desk support, incident resolution, networking, and Windows systems / Active Directory expertise with practical software engineering experience building a full-stack veterinary management platform (PostgreSQL, .NET Core, C#, React/Angular) and a home NAS server for personal hosting. Experienced in identity and access management (Azure Entra ID, SailPoint) and enterprise security governance. Strong analytical and problem-solving skills, fast learning curve, and a growth path toward software engineering, systems administration, and cybersecurity roles.

TECHNICAL SKILLS

- **Software Development:** C#, .NET Core, PostgreSQL, React, Angular, JavaScript, Java, Python, PHP
- **Support & Troubleshooting:** Incident management, root cause analysis, escalation handling, ticketing systems, log analysis
- **Cloud & Security:** Azure Entra ID (IAM), Azure Portal (user, role, and configuration management), identity governance (SailPoint), cloud security fundamentals
- **Directory & Collaboration:** Active Directory, SharePoint, Microsoft 365
- **Diagnostic Tools:** Remote support tools, log analysis, system diagnostic tools
- **Databases:** PostgreSQL, SQL / Oracle (basic level)
- **Systems & Networking (Home Lab):** OpenMediaVault (OMV / OMV-Extras), Docker, static IP configuration, NAS administration
- **AI Tools:** Claude Code, GitHub Copilot, Codex (ChatGPT)

CERTIFICATIONS

- Cybersecurity Fundamentals — IBM (Aug. 2026)
- Getting Started with Cybersecurity — IBM (Aug. 2026)
- Cyber Threat Management — Cisco Networking Academy (Aug. 2026)
- AI Skills Fest 2026 — Microsoft (Jun. 2026)

PROFESSIONAL EXPERIENCE

Junior Developer — Dev Labs | Aug 2025 – Present (part-time, ~1 year coding experience, alongside studies)

- Developed and supported features across frontend and backend systems, including hands-on coding in production environments
- Investigated and resolved technical issues, contributing to debugging and troubleshooting processes
- Collaborated with teams to identify defects and improve application performance

Cybersecurity Intern — Oxford Computer Group | Dec 2025 – Mar 2026 (part-time, alongside studies)

- Administered Azure Entra ID environments (user provisioning, access control)
- Assisted in resolving identity and access issues
- Supported enterprise security and identity governance processes (SailPoint)

Technical Support Agent — Extremetech | Jun 2025 – Sep 2025

- Handled approximately 25–40 inbound calls per day in a high-volume call center environment
- Diagnosed and resolved hardware and software issues, escalating complex cases when needed

- Maintained high customer satisfaction through clear and effective communication

Freelance IT Support — Independent | 2022 – Present

- Provided end-to-end technical support for desktops, laptops, and networks, addressing end-user reports
- Diagnosed and resolved system and connectivity issues, isolating network problems
- Configured networks and performed preventive and corrective equipment maintenance

PROJECTS

Huellitas Vitales — Full-stack veterinary management system

- Designed and developed a general-purpose management platform for veterinary businesses, covering appointment scheduling, a marketplace, product catalog, business/provider management, and supplier handling
- Built the backend with C# and .NET Core, using PostgreSQL as the primary database
- Developed the frontend with React and Angular
- Handled end-to-end feature design, data modeling, and integration between frontend and backend layers

Home NAS Server — Personal Hosting & Home Lab

- Designed, assembled, and configured a home NAS server using OpenMediaVault (OMV) with the OMV-Extras plugin to expand the range of available plugins
- Currently running 480GB SSD storage, with a planned expansion of approximately 1TB of additional storage
- Deployed and manages Docker containers to host multiple self-hosted services: Jellyfin and Plex (media streaming), Pi-hole and AdGuard Home (network-wide ad-blocking and DNS), and Homarr (centralized application dashboard)
- Configured static IP addresses on both the router and the NAS to improve network security, stability, and availability
- Home-lab project aimed at strengthening hands-on skills in systems administration, networking, containerization, and virtualization

EDUCATION

- Bachelor's degree in Informatics Engineering — Coursework completed; Final Graduation Project (TFG/thesis) in progress, to be completed in the last term of 2026

LANGUAGES

- Spanish: Native
- English: B2+

KEY STRENGTHS

- Fast learner with strong adaptability in high-pressure, high-volume environments
- Practical software development experience combined with IT support and security background
- Clear and effective communication with end users and cross-functional teams
- Structured, standards-driven approach to incident handling and documentation
- Self-driven initiative to learn new technologies through personal projects (e.g., home NAS server)
- Growth-oriented: actively building toward software engineering, systems administration, and cybersecurity roles
